**** Please note that this storm may not have necessarily been considered a "named storm" at this incident location ****

This Tropical Cyclone Report is an automated product meant to be an informational tool that displays various hour by hour weather conditions that existed at a property. The Tropical Cyclone Report utilizes an algorithm that ingests model data, surface observations, Doppler radar data, storm reports, and other information to display sustained winds, wind directions, wind gusts, rainfall, temperatures, pressure, and storm surge at the property. The wind speed values are based on weather records and information that was available at the time it was generated.
